

# Singly linked lists

.contains(10)

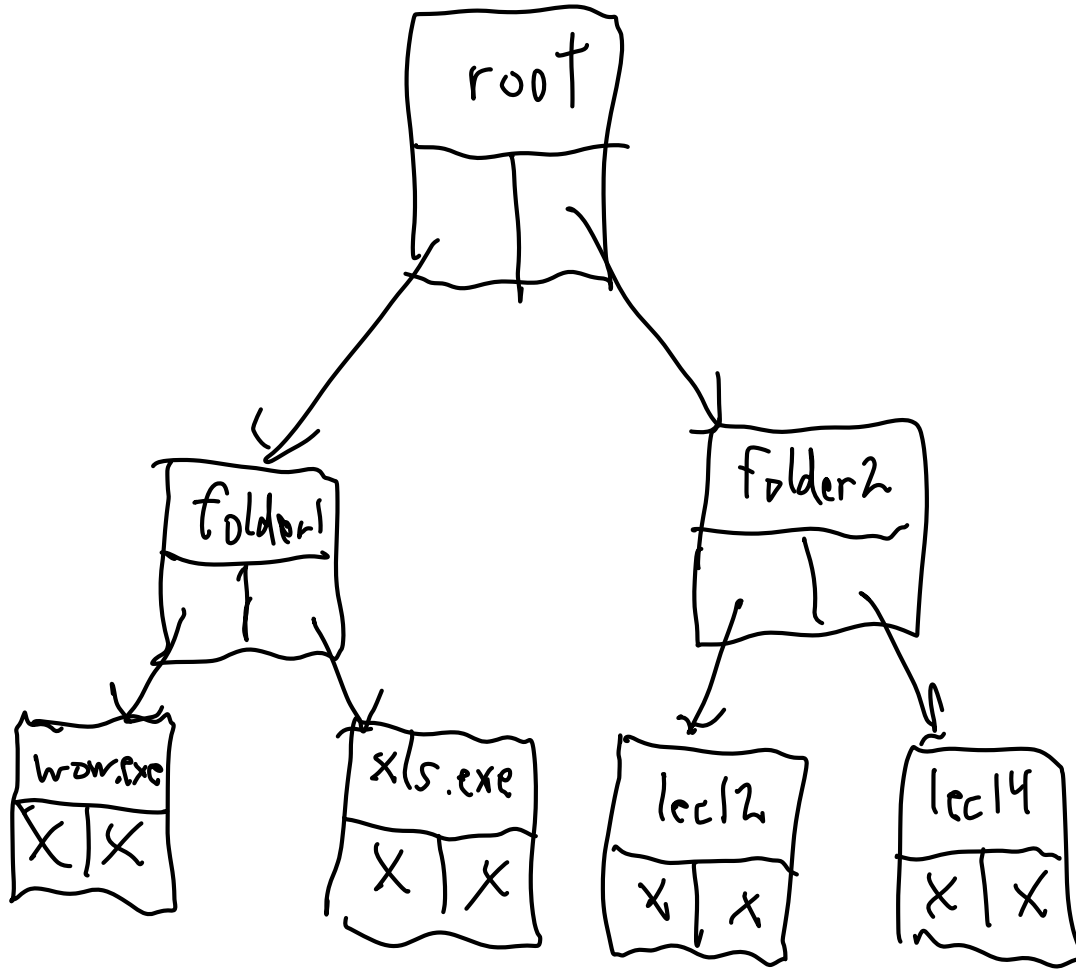

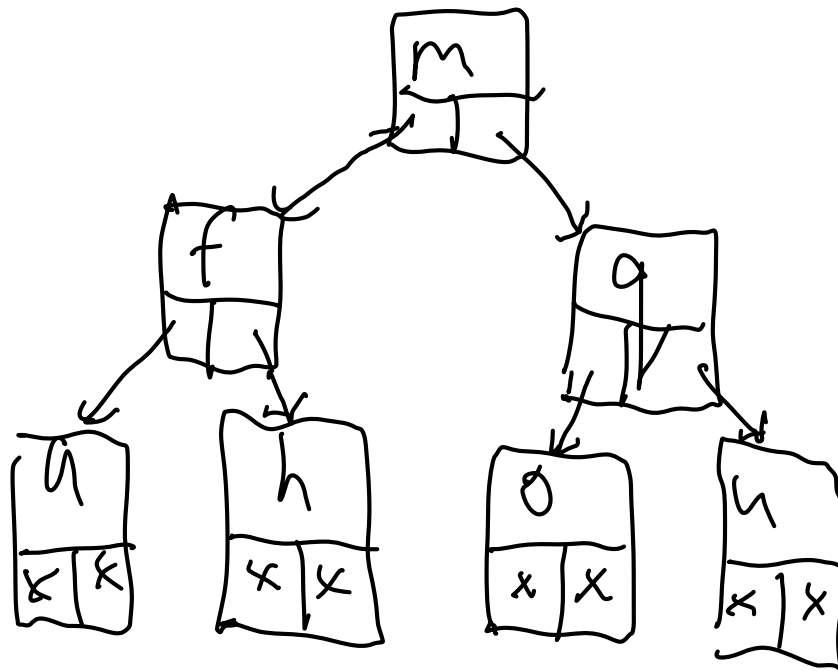

# Trees

They are "binary search trees" if for each subtree, all values to the left of the root have a smaller value than it and all values to right have greater values

- This makes it fast to search for values

# Dynamic arrays

1	2	3	20	45
---	---	---	----	----

1	2	3	20	45	8	10	14	16	18
---	---	---	----	----	---	----	----	----	----

↑	↑	↑								etc...
---	---	---	--	--	--	--	--	--	--	--------
