DS 110 Final Project Peer Assessment

If you have more than one teammate, answer the teammate questions once per teammate. Submit your answers as a PDF, one submission per student. Your answers are confidential.

Teammate Questions (Answer for each teammate)

1. What is your teammate's **name**?

Kayla Wu

2. What has your teammate **done so far** for the project?
- Constantly provide constructive advice on code and final paper
- Drafted parts of final paper and project proposal, and brainstorming documents
- Having continuous discussions about the goals and execution of our project.

3. In general, would you say the **attitude** your partner is bringing to the project **doesn't meet** your expectations, **does meet** your expectations, or **exceeds** your expectations?
- Kayla's attitude was exactly what I expected. From the way I observed how serious she was about coding and completing assignments, as well as her desire to learn, I knew she must be a very serious and responsible person. This was confirmed by her performance in the project.

4. In general, would you say the **amount of work** your teammate has done so far **doesn't meet** your expectations, **does meet** your expectations, or **exceeds** your expectations?

- She devotes a lot of time to our project, so almost every day or two we have an exchange of ideas or a discussion in various ways. I think this has helped the progress of the project significantly.

- I think the greatest investment of her time was in the basic construction of our project, which allowed me to focus my thinking more deeply on the coding part, to solve the various problems we would encounter in codin.

5. Does your partner's **amount and timeliness of communication** with you **not meet**, **meet**, or **exceed** your expectations?

- The amount and timeliness of Kayla's communication with me was completely above and beyond my expectations. She provided constructive advice almost every day, even during the holidays. At the same time, she respects my ideas and adds both of our inputs to the project. She is arguably the best partner I have ever met.

Self Questions

6. What have you **done so far** on the project?

- Completed most of the coding tasks.

- At the beginning of the project, brainstorm the possible datasets or methods that can be used, and make continuous improvements to the code.

- Construct the files for the final presentation

- Drafted parts of final paper and project proposal

- Effective and ongoing communication with Kayla.

7. Have any **adverse circumstances** made it difficult for you to contribute to the project so far?

- Not at all, there is no such situation.

8. What could you be doing **better** on the project?

- I think what I can do is to divert some energy to the areas of the project where I need to write, such as the proposal and final paper.

Overall Questions

9. Do you feel your project is **on track**?

- I have every and justifiable reason to think that our project was exactly as we both thought it would be and the time projections.

- We created a rough roadmap at the beginning of the project to help us keep check of the completion of tasks and dues dates.
